

NEW PARTNERSHIP PROJECT GE AFRICA INNOVATION CENTRE IN SOUTH AFRICA

Scientific Surgical is our authorized distributor in South Africa and they embarked on a partnership to promote APOLLO RT contrast injectors at the GE Africa Innovation Centre in Johannesburg, South Africa.

About GE Africa Innovation Centre

GE Africa Innovation Centre (GE AIC) serves Sub-Saharan Africa, and is dedicated to the rollout of sustainable strategic innovation programmes, projects and solutions for the region. The GE AIC is part of a network of 12 GE Innovation Centres and 30 GE Digital Foundries, Garages and Research Centres across the world.

Our Work & The Future

APOLLO RT provided APO200 (Dual syringe CT injector) in GE AIC and it is the perfect opportunity for Scientific Surgical and APOLLO RT to allow prospective customers as well as existing customers a hand on experience with APOLLO RT contrast Media Injectors. The centre and partnership provide a platform for Radiologist, Radiographer and peripheral staff to get a hand on experience with APOLLO RT injectors. This provides the ultimate confidence or prospective customers to make key decisions around their purchasing requirements. The future is promising for APOLLO RT product in Southern Africa & Africa. With continued growth in Africa, delivering healthcare to key African markets is a challenge that puts Scientific Surgical at the forefront of a quality brand offering, aiming to capture, service and support the need of developing markets in the region.

About APOLLO RT

APOLLO RT is a group of young, dynamic, and professional international managers; our Company focuses on manufacturing high-quality contrast media injectors, syringes & disposables, widely used in medical imaging field.
